

## Site Plan Requirements

1. Accurately show location of building on lot.
2. Accurately show distances to lot lines from all sides of structure.
3. Show locations of all public easements.
4. Show locations and dimensions of property lines on all sides of lot.
5. Show all other existing structures on the lot.
6. Provide North indicator to indicate orientation of building on lot.
7. Indicate locations of utilities entering lot.
8. Provide locations of porches and decks.
9. Provide address.

\*Please note that projects that disturb more than 10,000 square feet of area will require an Engineered Comprehensive Site Plan review per the Design and Construction Standards Manual
