## **HPD Arrests Suspect for Embezzling Nearly \$1 Million**

HARRISONBURG, VA – On October 12, 2021 the Harrisonburg-Rockingham Community Services Board (HRCSB) contacted the Harrisonburg Police Department regarding an employee suspected of embezzling a substantial sum of money between 2019 and 2021.

The suspect was identified as Andrew Hahn, 36, of Winchester, who was employed as the Information Technology (IT) Manager at the HRCSB. HRCSB management was alerted by other employees to minor discrepancies and missing equipment, which triggered an internal investigation and an external financial audit. Hahn, who was terminated after the start of the investigation, is accused of embezzling nearly \$1 million from the agency.

As the IT Manager, Hahn had control and oversight of requests for proposal (RFPs) for IT related needs. Hahn is accused of creating a shell company, submitting an RFP, and awarding the contract to himself through the shell company. Hahn used the shell company to significantly up-charge products that he provided and charged for products that were never delivered to HRCSB. A large part of the embezzled funds went to support his lavish lifestyle habits as well as personal financial investments.

On January 5, 2022, detectives from HPD's Major Crimes Unit and the Winchester Police Department executed several search warrants in Winchester, Virginia. Detectives recovered financial records and electronic devices with suspected digital evidence, and seized two vehicles, which were reportedly purchased using embezzled funds. Hahn was also taken into custody without incident and charged with felony money laundering and five counts of felony embezzlement. Since his arrest in Winchester, Hahn was transferred to the Rockingham-Harrisonburg Regional Jail where he is being held without bond.

Hahn used his position to his advantage and went to great lengths to conceal his actions from the HRCSB. The investigation revealed that the employer followed common and standard business practices, including internal and external audits, but Hahn found a way to circumvent these
