Smith Creek TMDL 39

Introduction

The City of Harrisonburg is an independent city located in the Shenandoah Valley of the Commonwealth of Virginia and is surrounded by Rockingham County. The City is an operator of a Small Municipal Separate Storm Sewer System (MS4). A *municipal separate storm sewer* means "a conveyance or system of conveyances otherwise known as a municipal separate storm sewer system, including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, manmade channels, or storm drains:

1. Owned or operated by a federal, state, city, town, county, district, association, or other public body, created by or pursuant to state law, having jurisdiction or delegated authority for erosion and sediment control and stormwater management, or a designated and approved management agency under § 208 of the CWA that discharges to surface waters;
2. Designed or used for collecting or conveying stormwater;
3. That is not a combined sewer; and
4. That is not part of a publicly owned treatment works."

The US Census in 2010 determined the City's population to be 48,914, that the City is within an Urbanized Area, and thus subject to the amended and reissued General VPDES Permit for Discharges of Stormwater from Small Municipal Separate Storm Sewer Systems, which became effective November 1, 2018 and will expire on October 31, 2023 when a new permit cycle is expected to become effective.

The MS4 Permit requires the City to develop an MS4 Program Plan and to submit Annual Reports (this document), for each period between July 1 through June 30. Modifications to the MS4 Program Plan are expected throughout the life of the permit as part of the iterative process to reduce pollutant loadings and to protect water quality. The City's MS4 Program Plan and Annual Reports available on the City's Stormwater webpages: http://www.harrisonburgva.gov/stormwater-management-program.

Additional information on the laws and regulations affecting the City and its operation of an MS4 can be found in:

- Virginia Stormwater Management Act, Article 2.3 (§62.1-44.15-24 et seq.) of Chapter 3.1 of Title 62.1 of the Code of Virginia
- Virginia Administrative Code, 9VAC25-870, Virginia Stormwater Management Program (VSMP) Regulations
- Virginia Administrative Code, 9VAC25-890-40, General VPDES Permit for Discharges of Stormwater from Small Municipal Separate Storm Sewer Systems
- Virginia Department of Environmental Quality, Municipal Separate Storm Sewer Systems, https://www.deq.virginia.gov/permits-regulations/permits/water/municipal-separate-storm-sewer-system-permit-ms4s-stormwater

Watersheds

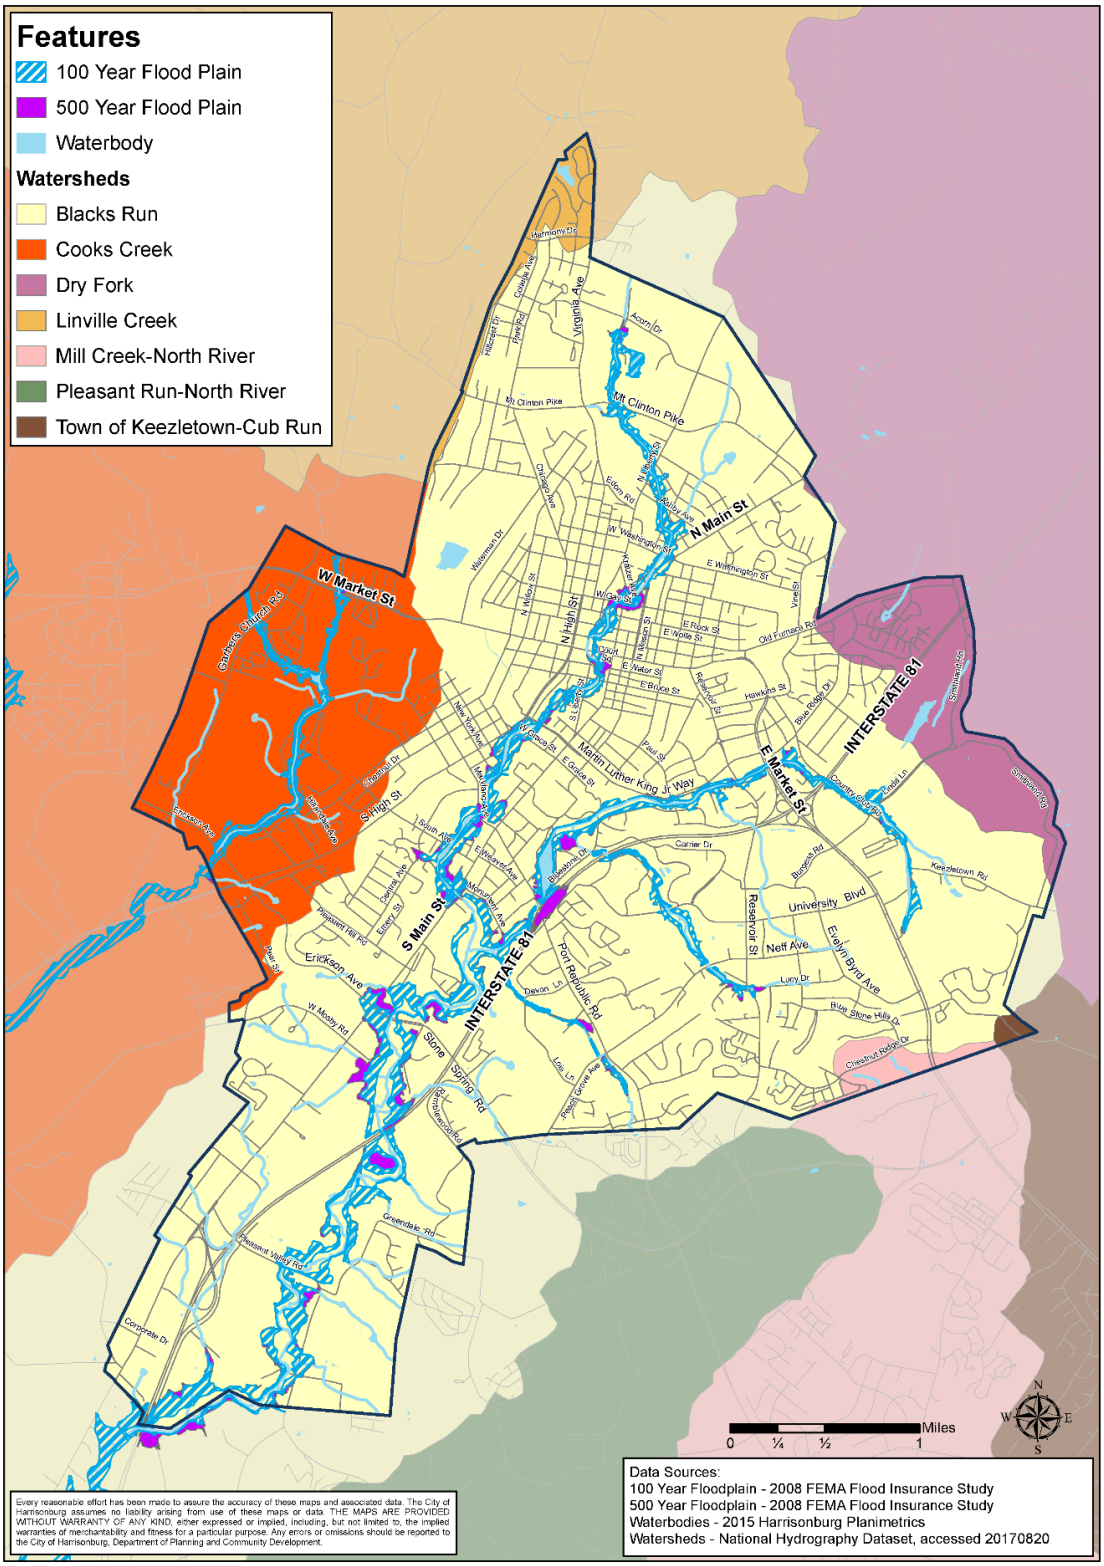
The City of Harrisonburg's 17.4 square miles is highly urbanized with substantial amounts of impervious surface. The following table describes approximate stream length, drainage areas, and impairments for each watershed within Harrisonburg city limits.

Table 1. Subwatersheds in Harrisonburg

Subwatershed Name	Hydrologic Unit Code (HUC)	Approximate Length (miles) within Harrisonburg	Approximate Drainage Area (acres)	Impairments	TMDL WLA?
Blacks Run ***(flows into Cooks Creek)***	PS22	8.67	9067	Fecal Coliform, Sediment, Total Phosphorus	*Yes, 2019*[1]
Sunset Heights Branch of Cooks Creek	PS23	2.09	1347.58	Fecal Coliform, Sediment, Total Phosphorus	*Yes, 2019*[2]
Dry Fork ***(flows into Smith Creek)***	PS59	0.206	493	E. Coli, Sediment	*Yes, 2004*
North River-Mill Creek	PS26	No stream	87.44	E. Coli	No
Cub Run ***(flows into South Fork of Shenandoah River)***	PS33	No stream	14.75	E. Coli	No
Linville Creek ***(flows into North Fork of Shenandoah River)***	PS56	0.08	117.8	E. Coli, Sediment	No

[1, 2] The revision of the Blacks Run and Cooks Creek Watershed TMDL includes a WLA. This TMDL was approved by the EPA on July 10, 2019 and so a local TMDL Action Plan will not be developed for this permit cycle.

Figure 1. Subwatersheds in Harrisonburg



The City of Harrisonburg also drains into the Chesapeake Bay Watershed. The Chesapeake Bay Watershed is 64,000 square miles and includes portions of New York, Pennsylvania, Delaware, Maryland, West Virginia, and Virginia. Altogether, more than 100,000 streams, creeks and rivers make up the Chesapeake Bay Watershed. As part of the Special Conditions for the Chesapeake Bay TMDL, the MS4 Permit requires the City of Harrisonburg to address impairments for phosphorus, nitrogen, and sediment that enter the Chesapeake Bay.

Figure 2. Chesapeake Bay Watershed Map

Roles and Responsibilities

The City of Harrisonburg's Public Works Department coordinates the City's municipal separate storm sewer system (MS4) program. The Public Works Department's Sustainability and Environmental Manager is responsible for developing and updating the MS4 Program Plan and submitting Annual Reports. The City Manager is responsible for providing the appropriate certification for documents. The Department of Community Development, Department of Public Utilities, the Department of Parks and Recreation, Police Department and Fire Department are the major contributors to Harrisonburg's MS4 Program although it is recognized that this is a citywide and community-wide program.

For MS4 Permit coverage, Harrisonburg City Public Schools (HCPS) and Harrisonburg Electric Commission (HEC) are covered by the City of Harrisonburg's MS4 Permit and their responsibilities are referenced throughout the MS4 Program Plan and associated Annual Reports.

MS4 Annual Report

The MS4 Annual Report details the City of Harrisonburg's stormwater program to manage the quality of stormwater runoff discharged from the MS4.

Evaluations gathered while developing the 2020-2021 MS4 Annual Report will be considered during the minimum control measure evaluations throughout the document as well as in the MS4 Program Plan. This report and subsequent annual reports from the five year permit cycle will remain on file in the Public Works Department and on Harrisonburg's stormwater webpage: www.harrisonburgva.gov/stormwater-management-program.

Minimum Control Measure #1: Public Education & Outreach

BMP 1.1: Develop and Implement a Public Education and Outreach Program

Description

The City will implement a public education and outreach program designed to:

- Increase the public's knowledge of how to reduce stormwater pollution, placing priority on reducing impacts to impaired waters and other local water pollution concerns.
- Increase the public's knowledge of hazards associated with illegal discharges and improper disposal of waste, including pertinent legal implications.
- Implement a diverse program with strategies that are targeted toward individuals or groups most likely to have significant stormwater impacts.

The City will identify no less than three high-priority stormwater issues to meet the goal of educating the public. The high-priority public education and outreach program will:

- Clearly identify the high-priority stormwater issues.
- Explain the importance of the high-priority stormwater issues.
- Include measures or actions the public can take to minimize the impact of the high-priority stormwater issues.
- Provide a contact name and telephone number or location where the public can find out more information.

Annual Reporting Requirements

- A list of the high-priority stormwater issues the City addressed in the public education and outreach program.
- A list of the strategies used to communicate each high-priority stormwater issue.

List of High Priority Stormwater Issues

High Priority Stormwater Issue 1: Chesapeake Bay Nutrients

Strategy 1: Traditional Written Materials

- Stormwater and Environmental Newsletters: This email newsletter has a subscription list of around 700 contacts and each newsletter is opened by around 40-50% of the subscription list.
  -
  - *The Tree Factor*. March 2021
  - *Rain Barrels- An effective means of pollution prevention.* May 2021
- Press Release: City press releases are posted on the City's webpage and are often picked up by local news outlets who share or report on the contents.
  - *Harrisonburg Honored Once Again as Tree City USA*. December 7, 2020
  - *City Wins 2021 Gold Medal Governors Environmental Excellence Award*. March 29, 2021
- Harrisonburg Public Works Facebook Page: The Harrisonburg Public Works Facebook page promotes high-quality receiving waters, education about the Chesapeake Bay and local TMDLs, and information about local events and projects. During this permit year

Harrisonburg Stormwater Facebook Page became Harrisonburg Public Works. This switch was made to capture more of the activities that occur at Public Works as well as to increase the number of people following our page. During this permit year, 91 posts were made to the Harrisonburg Stormwater Facebook page. Each post reached an average of 529 people.

Strategy 2: Media Materials

- WHSV TV-3 Reports
  - WHSV TV-3 Article, by Courtney Guiry: *The Harrisonburg Conservation Assistance Program introduces the green roof*. July 17, 2020.
  - https://www.whsv.com/2021/03/19/blacks-run-clean-up-day-arbor-day-tree-planting-event/
  - WHSV TV 3 Article, by Courtney Guiry: *Harrisonburg Public Works honored with Environmental Excellence award*. April 1, 2021
- Daily News Record Articles
  - Daily News Record Article, by Kathleen Shaw: Garden for the Greater Good. August 8, 2020. https://www.dnronline.com/dnronline/garden-for-the-greater-good/article_241b42b2-c627-574d-a139-b7ac5f105f51.html
  - Daily News Record Article, by Ian Munro: City Public Works Wins Gov.'s Gold Environmental Award. March 26, 2021. https://www.dnronline.com/news/local/city-public-works-wins-gov-s-gold-environmental-award/article_5f1e6a81-a1c4-5dd5-9fe8-0269d72abf49.html
- Other News Articles
  - Augusta Free Press Article: Purcell Park Bioreactor Project wins 2021 Gold Medal Governor's Environmental Excellence Award. March 31, 2021. https://augustafreepress.com/purcell-park-bioreactor-project-wins-2021-gold-medal-governors-environmental-excellence-award/
- Due to COVID-19, news cycles were dominated by stories related to the pandemic and the ability to generate news headlines regarding stormwater issues was partially limited.

Strategy 3: Speaking Engagements

- All speaking engagements attended by stormwater staff are focused on explaining water quality, including TMDLs, as well as Harrisonburg's role in meeting the Chesapeake Bay TMDL. Staff attended 6 educational events and reached an audience of approximately 101 participants. Additionally, staff gave a virtual presentation at the 2021 Governor's Environmental Excellence Awards Ceremony that reached an unknown number of people. These speaking engagements do not include Blacks Run Clean Up Day, Middle School Watershed Field Trips, or the annual rain barrel workshop as these events are counted as Public Involvement Activities. Our traditional reach through speaking engagements was partially reduced this permit year due to COVID-19 restrictions that limited in-person meetings as well as school gatherings.

- HCAP Site Visits: The City partners with the Shenandoah Valley Soil and Water Conservation District (SVSWCD) to implement the Harrisonburg Conservation Assistance Program which includes speaking to landowners about stormwater issues during site visits. The SVSWCD conducted 14 site visits this past year.

High Priority Stormwater Issue 2: High Quality Receiving Waters

Strategy 1: Traditional Written Materials

- Stormwater and Environmental Newsletters: This email newsletter has a subscription list of around 700 contacts and each newsletter is opened by around 40-50% of the subscription list.
  - *Highlights from our MS4 Report*. September 2020
  - *It's all in the flow of things*. December 2020
  - *The tree factor.* March 2021
  - *Rain Barrels- An effective means of pollution prevention. May 2021*
- Press Release: City press releases are posted on the City's webpage and are often picked up by local news outlets who share or report on the contents.
  - *City Seeking Volunteers for Revisited Arbor Day Tree Planting*. October 5, 2020
  - *Harrisonburg Honored Once Again as Tree City USA*. December 7, 2020
  - *City Wins 2021 Gold Medal Governors Environmental Excellence Award*. March 29, 2021
- Harrisonburg Stormwater Facebook Page: The Harrisonburg Stormwater Facebook page promotes high-quality receiving waters, education about the Chesapeake Bay and local TMDLs, and information about local events and projects. During this permit year, Harrisonburg Stormwater Facebook Page became Harrisonburg Public Works. This switch was made to capture more of the activities that occur at Public Works as well as to increase the number of people following our page. During this permit year, 91 posts were made to the Harrisonburg Stormwater Facebook page. Each post reached an average of 529 people.

- Other News Articles
  - Augusta Free Press Article: Purcell Park Bioreactor Project wins 2021 Gold Medal Governor's Environmental Excellence Award. March 31, 2021. https://augustafreepress.com/purcell-park-bioreactor-project-wins-2021-gold-medal-governors-environmental-excellence-award/
- Due to COVID-19, news cycles were dominated by stories related to the pandemic and the ability to generate news headlines regarding stormwater issues was partially limited.

Strategy 3: Speaking Engagements

- All speaking engagements attended by stormwater staff are focused on explaining water quality, including TMDLs, as well as Harrisonburg's role in meeting the Chesapeake Bay TMDL. Staff attended 6 educational events and reached an audience of approximately 72 participants. These speaking engagements do not include Blacks Run Clean Up Day, Middle School Watershed Field Trips, or the annual rain barrel workshop as these events are counted as Public Involvement Activities. Our traditional reach through speaking engagements was partially reduced this permit year due to COVID-19 restrictions that limited in-person meetings as well as school gatherings.
- HCAP Site Visits: The City partners with the Shenandoah Valley Soil and Water Conservation District (SVSWCD) to implement the Harrisonburg Conservation Assistance Program which includes speaking to landowners about stormwater issues during site visits. The SVSWCD conducted 14 site visits this past year.

High Priority Stormwater Issue 3: Litter and Trash

Strategy 1: Traditional Written Materials

- Stormwater and Environmental Newsletters: This email newsletter has a subscription list of around 700 contacts and each newsletter is opened by around 40-50% of the subscription list.
  - *All newsletters promoted individual stream clean up events or our annual Blacks Run Cleanup event*
  - *It's all in the flow of things*. December 2020
- Harrisonburg Stormwater Facebook Page: The Harrisonburg Stormwater Facebook page promotes high-quality receiving waters, education about the Chesapeake Bay and local TMDLs, and information about local events and projects. During this permit year,

Harrisonburg Stormwater Facebook Page became Harrisonburg Public Works. This switch was made to capture more of the activities that occur at Public Works as well as to increase the number of people following our page. During this permit year, 91 posts were made to the Harrisonburg Stormwater Facebook page. Each post reached an average of 529 people.

Strategy 2: Media Materials

- WHSV TV-3 Reports
  - WHSV TV-3 Article, by Stephanie Penn: *Small group cleanups are in place at Blacks Run due to cancellation of "Blacks Run Clean up Day*". August 28, 2020.
  - WHSV TV-3 Article, by Courtney Guiry: *Blacks Run Clean-up Day & Arbor Day Tree Planting Event*. March 19, 2021 https://www.whsv.com/2021/03/19/blacks-run-clean-up-day-arbor-day-tree-planting-event/
- Due to COVID-19, news cycles were dominated by stories related to the pandemic and the ability to generate news headlines regarding stormwater issues was partially limited.

Strategy 3: Alternative Materials

- Clean Up Supplies: Apart from the Blacks Run Clean Up Day event, 16 smaller clean ups were organized throughout the year with community groups, university students, and local businesses. Trash bags and trash grabbers were provided for these events.
- Water Bottles: Re-usable water bottles were given out to Blacks Run Clean Up Day participants. These bottles have the Blacks Run Clean Up Day logo on them. Due to COVID-19 restrictions that limited in-person meetings we were not able to hold our annual Blacks Run Clean Up Day event.
- Staff attended the Pure Water Forum Annual Meeting as a guest speaker to present on Trash and litter- stream cleanups. This event was attended by 10 community members

BMP Effectiveness

Review of BMP: A wide variety of audiences was reached through this BMP and educated about the high-priority stormwater issues. Due to COVID 19 restrictions, some events were cancelled and some opportunities to engage with the community were limited. Staff met with several smaller groups throughout the year to promote stormwater messaging. Additionally, staff participated on two webinars to talk about stormwater topics

Program Plan Revisions: Program Plan revisions were not necessary. To increase our ability to educate our community, we will begin creating educational written messages in Spanish and Arabic. The MS4 Program Plan was revised to include Nutrients, Sediment, and Bacteria topics.

Minimum Control Measure #2: Public Involvement and Participation

BMP 2.1: Plan for, Respond to, and Document Public Input and Reports

Description

The City will develop and implement procedures for the following:

- The public to report potential illicit discharges, improper disposal, or spills to the MS4, complaints regarding land disturbing activities, or other potential stormwater pollution concerns.
- The public to provide input on the city's MS4 Program Plan.
- Receiving public input or complaints.
- Responding to public input received on the MS4 Program Plan or complaints.
- Maintaining documentation of public input received on the MS4 program and associated MS4 Program Plan and the city's response.

Annual Reporting Requirements

A summary of any public input on the MS4 program received and how the City responded.

Summary of Public Input

No public input on the MS4 program was received.

BMP Effectiveness

Review of BMP: The public can provide comments about the MS4 program and associated Program Plan as needed. Information about how to provide comments is listed on the stormwater webpages. The public can also attend the quarterly Stormwater Advisory Committee meetings to provide comment during the public comment period of the meeting.

Program Plan Revisions: Program Plan revisions were not necessary.

BMP 2.2: Develop and Maintain a Stormwater Webpage

Description

No later than three months after this permit's effective date, the City will develop and maintain a webpage dedicated to the MS4 program and stormwater pollution prevention. The following information will be posted on this webpage:

- The effective MS4 permit and coverage letter.
- The most current MS4 Program Plan or location where the MS4 Program Plan can be obtained.
- The annual report for each year of the term covered by this permit.
- A mechanism for the public to report potential illicit discharges, improper disposal, or spills to the MS4, complaints regarding land disturbing activities, or other potential stormwater pollution concerns.
- Methods for how the public can provide input on the city's MS4 program.

Annual Reporting Requirements

A webpage link to the city's MS4 program and stormwater website.

Website Information

The City's MS4 Program Plan and Annual Reports are available on the City's Stormwater webpages: http://www.harrisonburgva.gov/stormwater-management-program.

The City of Harrisonburg promotes reporting of construction site issues through its website at: http://www.harrisonburgva.gov/site-development.

The City of Harrisonburg operates an online pollution reporting form for citizens to report illicit discharges at: http://www.harrisonburgva.gov/report-pollution.

BMP Effectiveness

Review of BMP: The metric for determining if the BMP is effective is if the websites are maintained and available for use. All of the websites are available for citizens to use and the City promotes the use of the websites periodically throughout the year.

Program Plan Revisions: Program Plan revisions were not necessary.

BMP 2.3: Implement Four Public Involvement Opportunities

Description

The City will implement no less than four activities per year from two or more of the categories described in the permit to provide an opportunity for public involvement to improve water quality and support local restoration and clean-up projects.

Annual Reporting Requirements

- A description of the public involvement activities implemented by the City.
- A report of the metric as defined for each activity and an evaluation as to if the activity is beneficial to improving water quality.
- The name of other MS4 permittees who participated in the public involvement opportunities.

Public Involvement Activities

- Blacks Run Clean Up Day: Blacks Run Clean Up Day is the annual community stream clean up organized by the City of Harrisonburg. The Event is usually held in April and includes educational exhibits from participating organization. In the past, these have included the Shenandoah Valley Soil and Water Conservation District, Climate Action Alliance of the Valley, Wild Virginia, James Madison University, Virginia Master Naturalists, Potomac Appalachian Trail Club, Chesapeake Bay Foundation, Virginia Department of Forestry, Virginia Clean Cities, Harrisonburg Parks and Recreation, Harrisonburg-Rockingham Regional Sewer Authority, Bring Your Own, Virginia Department of Environmental Quality, and The Natural Garden. The website www.cleanstream.org has information on past and upcoming clean up day events. Further documentation is available upon request.
- Household Hazardous Waste Collection Days: Household Hazardous Waste Collection Days are organized by the City of Harrisonburg and Rockingham County and are offered to residents so they can properly dispose of their household hazardous waste. The collection days were held on October 10, 2020 and May 8, 2021.
- Middle School Watershed Field Trips: City of Harrisonburg middle school students participate in hands-on watershed field trips as a part of their curriculum. The program introduces middle schoolers to their local watershed. 6th graders participate in "Plant-a-Seed" where they learn

about river hydrology, macroinvertebrates, and water chemistry. 7th graders participate in a river field trip where they go rafting, learn about mapping watersheds, and identify trees. City of Harrisonburg staff help to teach lessons during these trips. The events are usually held on multiple days.

- Rain Barrel Workshops: Rain Barrel workshops are organized by the Shenandoah Valley Soil and Water Conservation District and the City of Harrisonburg. Participants are taught about water conservation and watershed health and make rain barrels out of pickle barrels. Two Rain Barrel Workshops will be planned for the fall and spring pending enough participants signup to hold both events.

BMP Effectiveness

Review of BMP:

- Blacks Run Clean Up Day: The metric for determining if the activity is beneficial to water quality will be tonnage of trash picked up. The average range of pounds of trash removed from 2001 – 2018 is 3,900 pounds – 8,100 pounds. Due to COVID-19 restrictions, the event was smaller than in past years and there was no Green Scene. Even still, 200 volunteers helped to clean stream sections (removing 2.5 tons of trash) and 50 volunteers helped to plant trees along the Northend Greenway Trail. In addition, 16 volunteer groups assisted with stream clean events throughout the year. The volunteers assisted in collecting 6,380 pounds (3.2 tons) of trash. Additionally, these volunteers removed several tires, and other large miscellaneous items. These small group events are reported as part of the MCM #1, but due to COVID-19 restrictions impacting this event, we wanted to note work completed here as well.
- Household Hazardous Waste Collection Days: The metric for determining if the activity is beneficial to water quality will be the type and amounts of items dropped off during the collection days. Collection days were run jointly for Harrisonburg City and Rockingham County residents. Over 10,100 items were collected at the October event across 20 different item categories. 11,088 items were collected at the May event across 22 different item categories. More information is available upon request.
- Middle School Watershed Field Trips: The metric for determining if the activity is beneficial to water quality will be the number of students reached through staff taught lessons. Due to COVID-19 restrictions, the planned fall and spring events were cancelled limiting the scope this permit year. However, staff still held several educational events for individual classes outside during the permit year and were able to still reach 101 attendees as mentioned in MCM1.
- Rain Barrel Workshops: The metric for determining if the activity is beneficial to water quality will be the number of participants in the workshop and the amount of rain barrels built. At our June 16th Workshop, 25 people attended and 26 rain barrels were made.

Program Plan Revisions: In the event that COVID-19 restrictions continue to limit our ability to do the Middle School Watershed Field Trips, alternative, smaller events will be utilized. Additionally, public workshop/information booths at other City events may be utilized to get more engagement. Traditionally, our Rain Barrel Workshop has been an annual event held in the fall. In order to increase participation, two Rain Barrel Workshops will be planned for the fall and spring pending enough participants signup to hold both events.

Minimum Control Measure #3: Illicit Discharge Detection and Elimination

BMP 3.1: Develop and Maintain a Storm Drain System, Outfalls, and Information Map

Description

The City will develop and maintain an accurate MS4 map and information table, which will be submitted to the DEQ no later than July 1, 2019 and updated no later than October 1 of each year. If any physical interconnections to other MS4s are established or discovered, written notification will be provided to those MS4s.

Annual Reporting Requirements

A confirmation statement that the MS4 map and information table are up-to-date as of June 30 of the reporting year.

Confirmation Statement

The MS4 map and information table are up-to-date.

BMP Effectiveness

Review of BMP: The MS4 map and information table are up-to-date and were submitted to the Department of Environmental Quality.

Program Plan Revisions: No Program Plan changes are needed at this time.

BMP 3.2: Prohibit Illicit Discharges and Connections through Ordinance Language

Description

The City shall prohibit, through ordinance, policy, standard operating procedures, or other legal mechanism, to the extent allowable under federal, state, or local law, regulations, or ordinances, unauthorized non-stormwater discharges into the storm sewer system.

Annual Reporting Requirements

No requirements

BMP 3.3: Maintain and Implement Illicit Discharge Detection and Elimination Written Procedures

Description

The City will maintain and implement illicit discharge detection and elimination (IDDE) written procedures designed to detect, identity, and address unauthorized non-stormwater discharges, including illegal dumping, to the MS4 with the goal of eliminating the unauthorized discharge. Procedures will include dry weather field screening of at least 50 outfalls per year.

Annual Reporting Requirements

- The total number of outfalls screened during the reporting period as part of the dry weather screening program.
- A list of illicit discharges to the MS4 including spills reaching the MS4.

Number of Outfalls Screened

During the 2020-2021 reporting period, 50 MS4 outfalls were inspected and 0 active illicit discharges were observed or required follow-up.

Illicit Discharges

The incidents listed in the Illicit Discharge Summary 2020-2021 report include potential (having entered the storm sewer system but not having entered the live waterway) and actual illicit discharges (having entered the storm sewer system and the live waterway). Other suspect illicit discharges (dumping activity or spills away from the storm sewer system) are tracked and enforced as needed. Unfounded illicit discharges are incidents reported as an illicit discharge that are inspected by City Staff and determined to be an unfounded compliant. These unfounded reports are also entered into Cityworks. A summary of incident details is provided below. Further information is available by request.

InspectionId	Incident Discovered By	Date Inspected	Finish Date	Status	Narrative	Resolution
47404	Reported to DEQ	8/24/2020	9/24/2020	Closed	Complaint to DEQ that trash truck was dumping liquids onto ground. No pictures or evidence provided. DEQ forwarded complaint	Called and spoke with Trash or Treasure. Employee stated they would train crews to remind them not to dump liquids on ground
47521	PW Field Staff	9/17/2020	10/21/2020	Closed	5 containers of thinfilm curing compound fell off truck. 1.5 - 2 containers spilled	Stay Dri applied + sand. Swept up and washed product into flusher truck
47930	HFD Inspection	10/2/2020	11/16/2020	Closed	Auto repair shop was working on changing an engine in a vehicle in the parking lot of their business. The fluids were not properly drained and leaked onto the parking lot before running downhill into the grass.	Owner had apply absorbent material under vehicle to soak up most of the spill prior to our meeting. Business stopped operating there.

InspectionId	Incident Discovered By	Date Inspected	Finish Date	Status	Narrative	Resolution
48219	PW Field Staff	10/13/2020	10/21/2020	Closed	Diesel fuel smell in DIs along road. Traced back to pumps 8 & 9 that have evidence of a fuel spill. After review of camera footage from the truck stop observe a truck drivers fuel pump disconnect and spilled into storm drain.	Holtzman Oil came to pump the material out, flush the lines, and scoop any contaminated sediment material out of storm drains. Also, went across S.Main to open ditch and removed contaminated soil and riprap.

InspectionId	Incident Discovered By	Date Inspected	Finish Date	Status	Narrative	Resolution
48257	CD Staff	10/14/2020	10/14/2020	Closed	City staff received a notice that a white, odorless substance was observed leaving the property and entering the storm drain. Staff inspected the site and found evidence of a white substance entering the storm drain and was traced back to paint buckets on the property. The owner was contacted and he advised that he had spilled Latex paint in the back of the truck and washed it off with a garden hose. The residue had traveled to the drop inlet at the corner of S. Mason and Campbell.	Public Works completed cleanup of the site by washing the product into the flusher truck to mitigate the hazard. Owner agreed to pay the cost of the cleanup
48277	Citizen Call in	10/15/2020	10/15/2020	Closed	Received call that two 5 gallon buckets of motor oil had fallen and spilled at the edge of the road. Not all of the motor oil spilled out of the buckets.	City staff applied absorbent material and used street sweeper to clean up site. The two buckets were removed

InspectionId	Incident Discovered By	Date Inspected	Finish Date	Status	Narrative	Resolution
48817	HFD Inspection	10/28/2020	12/15/2020	Closed	Fire notified us that building occupant is dumping paint into the drains and in a pit outside	Met with shop owner, area has been cleaned up
55810	HFD	1/28/2021	Ongoing	Open	open top oil pans were observed out in the open, oil staining was prevalent on pavement and in grass, and the shop was out of absorbent material	In process of enforcement procedures. No final resolution at this time
51871	HFD- Fire Response	3/4/2021	4/2/2021	Closed	We were told that the excavation company didn't realize the transformer had power and tried to remove it. There was oil leaking from the transformer out on the ground around it. HEC had their clean up crew responding to handle it.	HEC crews handled cleanup and disposal

InspectionId	Incident Discovered By	Date Inspected	Finish Date	Status	Narrative	Resolution
52035	HFD	3/10/2021	3/11/2021	Closed	Rockingham County Fire and Rescue had a hydraulics line bust during a training exercise. About 57 gallons of fluid was spilled. Rocking F&R put down absorbent material to contain spill. Material was dug out and disposed of	PW excavated two dump truck loads of soiled material and hauled to the landfill. Clean stone was backfilled into the area
54462	Reported to DEQ	5/24/2021	5/24/2021	Closed	Concern was "working on large tractor trailer trucks in the driveway of this residence. Fluids are leaking onto the ground and concrete driveway". No evidence of fluids leaking on ground. Complaint was unfounded.	No evidence of fluids leaking on ground. Complaint was unfounded.
56199	HFD	6/25/2021	7/2/2021	Closed	Lift on site leaking hydraulic fluid.	HFD sent NOV detailing violation and need to repair the lift leaking hydraulic fluid. Absorbent material placed on ground and equipment repaired

InspectionId	Incident Discovered By	Date Inspected	Finish Date	Status	Narrative	Resolution
56326	HFD	6/29/2021	7/2/2021	Closed	HFD responded to a traffic crash involving a tractor-trailer at the above location, Incident #2021-00003790, that resulted in a complete rupture of one saddle tank. Approx. 80 gallons of diesel fuel was spilled on the roadway.	HFD and PW staff used 24 bags of Oil-Dri absorbent and a load of sand to contain spill. Hart Towing acted as Haz-Mat cleanup. PW cleaned up site.
56589	Landowner complaint	6/30/2021	7/19/2021	Closed	Oil stains observed throughout parking lot/drive and under tractor trailers being repaired. Both tenants claimed the other was responsible. We hand delivered two copies of the letter to both tenants.	Oil stain spots in gravel had been cleaned and removed

BMP Effectiveness

Review of BMP: Outfalls were screened, and illicit discharges were followed up on per the permit requirements.

Program Plan Revisions: Program Plan changes are not needed at this time.

Minimum Control Measure #4: Construction Site Stormwater Runoff Control

BMP 4.1: Use Legal Authority to Address Discharges Entering the MS4

Description

The City will utilize its legal authority, such as ordinances, permits, orders, specific contract language, and interjurisdictional agreements, to address discharges entering the MS4. The City will control construction site stormwater runoff by implementing its Virginia Erosion and Sediment Control Program (VESCP) consistent with the Virginia Erosion and Sediment Control Law (Sec. 62.1-44.15:51 et seq. of the Code of Virginia) and Virginia Erosion and Sediment Control Regulations (9VAC25-840).

Annual Reporting Requirements

- A confirmation statement that land disturbing projects that occurred during the reporting period have been conducted in accordance with the current department approved standards and specifications for erosion and sediment.
- If one or more or the land disturbing projects were not conducted with the department approved standards and specifications, an explanation as to why the projects did not conform to the approved standards and specifications.
- Total number of inspections conducted.
- The total number and type of enforcement actions implemented and the type of enforcement actions.

Confirmation Statement

All land disturbing projects that occurred during the 2020-2021 reporting period were conducted in accordance with the current department approved standards and specification for erosion and sediment control.

Explanation of Nonconformity

All land disturbing projects were conducted in accordance with the current department approved standards and specifications.

Total Number of Inspections conducted

- Total number of land disturbing activities: 24
- Total number of acres disturbed: 66.27
- Total number of inspections conducted: 997

Enforcement Actions

During the 2020-2021 reporting period 997 land disturbing activity inspections were conducted. Of the 997 inspections, 622 potential violations were noted. The findings and corrective measures were noted in the inspection files and either discussed on site, or emails or written letters were sent to the property owners or RLDs. Of the 622 potential violations, 84 Notice to Comply letters were sent to the property owners or RLDs. All potential violations were resolved in a timely manner without the need for further enforcement actions.

BMP Effectiveness

Review of BMP: All land disturbing projects that occurred during the 2020-2021 reporting period were conducted in accordance with the current department approved standards and specifications. Potential violations were noted and Notice to Comply letters were sent and all potential violations were resolved in a timely manner without the need for further enforcement actions.

Program Plan Revisions: Program Plan changes are not needed at this time.

Minimum Control Measure #5: Post-Construction Stormwater Management for New Development and Development on Prior Developed Lands

BMP 5.1: Implement the VSMP

Description

The city has an approved Virginia Stormwater Management Program (VSMP) and so shall implement the VSMP consistent with the Virginia Stormwater Management Act (Sec 62.1-44.15:24 et seq. of the Code of Virginia) and the VSMP Regulations (9VAC25-870).

Annual Reporting Requirements

None

BMP 5.2: Inspection and Maintenance Program for City Owned Stormwater Management Facilities

Description

The City will implement an inspection and maintenance program for those stormwater facilities owned or operated by the City that discharges to the MS4. The City will:

- Develop and maintain written inspection and maintenance procedures to ensure adequate long-term operation and maintenance of its stormwater management facilities.
- Inspect city owned or operated stormwater management facilities no less than once per year.
- Conduct maintenance as necessary.

Annual Reporting Requirements

- Total number of inspections conducted on stormwater management facilities owned or operated by the City.
- A description of the significant activities performed on the stormwater management facilities owned or operated by the City to ensure they continue to perform as designed. This does not include activities such as grass mowing or trash collection.

City Owned BMP Inspections

All city-owned BMPs were inspected once, for a total of 53 inspections.

Significant Activities performed

Trapping for nuisance animals occurred on an as-needed basis in BMPs and all rodent holes were repaired after their removal. Invasive vegetation was chemically controlled in the Erickson serpentine detention as well as all the rain garden, meadow, and bioretention BMPs. All the rain garden and bioretention BMPs had mulch added. Additional native vegetation was added to the City Hall bioretention.

BMP Effectiveness

Review of BMP: All BMPs were inspected at least once during the permit year.

Program Plan Revisions: Program Plan changes are not needed at this time

BMP 5.3: Inspection and Maintenance Program for Privately Owned Stormwater Management Facilities

Description

The City will implement an inspection and maintenance program for privately owned stormwater facilities that includes:

- An inspection frequency of no less than once per five years.
- Adequate long-term operation and maintenance by the owner by requiring the owner to develop a recorded inspection schedule and maintenance agreement.
- Enforcement of maintenance as needed.

Annual Reporting Requirements

- The number of privately owned stormwater management facility inspections conducted.
- The number of enforcement actions initiated by the permittee to ensure long-term maintenance of privately owned stormwater management facilities including the type of enforcement action.

Private Stormwater BMP Inspections and Enforcement Actions

During this reporting period, there were 14 inspections and there were 0 enforcement actions for privately owned stormwater management facilities.

BMP Effectiveness

Review of BMP: The inspection and maintenance program was implemented per permit requirements.

Program Plan Revisions: Program Plan changes are not needed at this time.

BMP 5.4: Track and Report Stormwater Management Facilities

Description

The City will maintain an electronic database or spreadsheet of all known city owned or city operated and privately owned stormwater management facilities that discharge into the MS4. The database shall also include all BMPs implemented by the city to meet the Chesapeake Bay TMDL load reduction required. The database will be updated when new stormwater management facilities are brought on-line, or existing stormwater management facilities are discovered.

The City will use the DEQ Construction Stormwater Database to report stormwater management facilities installed to address the control of post-construction runoff from land disturbing activities for which the city is required to obtain a General VPDES Permit for Discharges of Stormwater from Construction Activities.

Historical BMPs will be reported using the DEQ Construction Stormwater Database, and new BMPs will be added to the DEQ BMP Warehouse on a yearly basis.

Annual Reporting Requirements

- A confirmation statement that the City submitted stormwater management facility information through the Virginia Construction Stormwater General Permit Database for those land disturbing activities for which the city was required to obtain coverage under the General VPDES Permit for Discharges of Stormwater from Construction Activities or a statement that the city did not complete any projects requiring coverage under the General VPDES Permit for Discharges of Stormwater from Construction Activities.
- A confirmation statement that the City electronically reported BMPs using the DEQ BMP Warehouse in accordance with the permit and the date on which the information was submitted.

Confirmation of VPDES Project Submittal

The permittee submitted stormwater management facility information through the Virginia Construction Stormwater General Permit database for those land disturbing activities for which the permittee was required to obtain coverage under the General VPDES Permit for Discharges of Stormwater from Construction Activities in accordance with Part I E 5 f

Confirmation of BMP Project Reporting

The permittee submitted BMPs using the DEQ BMP Warehouse in accordance with the permit on 9/9/2021.

BMP Effectiveness

Review of BMP: The remaining BMPs were not able to be reported on the DEQ BMP Warehouse and include:

1. Homeowner BMPs
2. Land Conversion
3. Permanent Credit Purchases

Program Plan Revisions: Program Plan changes are not needed at this time.

Minimum Control Measure #6: Pollution Prevention and Good Housekeeping for Facilities Owned or Operated by the Permittee

BMP 6.1: Maintain and Implement Written Procedures for Pollution Prevention and Good Housekeeping

Description

The City shall maintain and implement written procedures for those activities at facilities owned or operated by the City, such as road, street, and parking lot maintenance; equipment maintenance; and the application, storage, transport, and disposal of pesticides, herbicides, and fertilizers designed to:

1. Prevent illicit discharges
2. Ensure the proper disposal of waste materials, including landscape wastes;
3. Prevent the discharge of wastewater or city vehicle washwater into the MS4 without authorization under a separate VPDES permit

4. Require implementation of best management practices when discharging water pumped from utility construction and maintenance activities
5. Minimize the pollutants in stormwater runoff from bulk storage areas (e.g. salt storage, topsoil stockpiles) using best management practices
6. Prevent pollutant discharge into the MS4 from leaking municipal automobiles and
7. Ensure the application of materials, including fertilizers and pesticides, is conducted in accordance with the manufacturers recommendations

Written pollution prevention and good housekeeping procedures shall be utilized as a part of the employee training program.

Annual Reporting Requirements

A summary of any daily operational procedures developed or modified in accordance with the permit requirements during the reporting period.

Summary of new or modified operational procedures

No operational procedures were created or modified during the permit cycle.

Existing Standard Operating Procedures

- Bulk Storage Areas (Stockpiles)
- Dewatering Operations
- Discharge of Wastewater
- Disposal of Waste Materials (Landscaping)
- Equipment Maintenance
- Fertilizer and Pesticide Applications
- Leaking Automobiles & Equipment
- Municipal Wash Water
- Prevent Illicit Discharges
- Road & Street Maintenance
- Spill Kits
- Sweeper Pad

BMP Effectiveness

Review of BMP: Operational procedures are available on the City intranet (C2) system accessible by all City of Harrisonburg employees and are distributed to site supervisors in hardcopy form to be stored in accessible location for employees to reference as needed.

Program Plan Revisions: Program Plan changes are not needed at this time.

BMP 6.2: Stormwater Pollution Prevention Plans

Description

Identify High-Priority, High-Potential Sites and Implement Stormwater Pollution Prevention Plans - The City will maintain and implement a site pollution prevention plan for each high-priority facility owned or operated by the permittee with a high potential to discharge pollutants that are not covered under a separate VPDES permit. SWPPP facilities will be inspected. Facilities without SWPPPs will be reviewed annually and added as necessary.

SWPPP Development for High-Priority, High-Potential Sites - Each SWPPP will contain information about the site and potential pollutants, written procedures designed to reduce and prevent pollutant discharge, procedures for training, an inspection and maintenance schedule, an inspection log, a log of unauthorized discharges, releases or spills.

Non-SWPPP Site Review - No later than June 30 of each year, the City will review any high-priority facility owned or operated by the City for which a SWPPP has not been developed to determine if the facility has a high potential to discharge pollutants. If the facility is determined to be a high-priority facility with a high potential to discharge pollutants, the City will develop a SWPPP no later than December 31 of that same year.

SWPPP Site Review - The City will review the contents of any site specific SWPPP no later than 30 days after any unauthorized discharge, release, or spill is reported to determine if additional measures are necessary to prevent future unauthorized discharges, releases, or spills. If necessary, the SWPPP will be updated no later than 90 days after the unauthorized discharge.

SWPPP Documentation - The SWPPP shall be kept at the high-priority facility with a high potential to discharge and utilized as part of staff training. The SWPPP and associated documents may be maintained as a hard copy or electronically if the documents are available to employees at the applicable site.

Facility Removal - If activities change at a facility such that the facility no longer meets the criteria of a high-priority facility with a high potential to discharge pollutants, the City may remove the facility from the high-priority, high-potential list.

Annual Reporting Requirements

- A summary of any new SWPPPs developed in accordance with the permit requirements during the reporting period
- A summary of any SWPPPs modified in accordance with the permit requirements during the reporting period.

Summary of new SWPPP Development

High-priority facilities were reviewed by June 30, 2021 to determine if there were any facilities meeting the high-priority, high-potential criteria requiring a SWPPP. One facility was identified:

1. Ramblewood Athletic Complex

SWPPPS will be developed and implemented on this facility by December 31, 2021.

One Facility previously identified as a high priority with high potential to discharge was re-evaluated as just a high priority facility due to change in facility operations. Central Stores will be moved from a SWPPP facility to a high priority facility.

1. Central Stores

Summary of SWPPP Modifications

Park View SWPPP May 2021 Changes

- Added outdoor storage area #16
- Added Facility Address on map
- Added Facility SWPPP operator on map

Transfer Station SWPPP May 2021 Map Changes

- Denoted new location of snowplows
- Added Facility Address on map
- Added Facility SWPPP operator on map

HEC SWPPP May 2021 Map Changes

- Labeled building numbers
- Added Facility Address on map
- Added Facility SWPPP operator on map

Public Utilities SWPPP May 2021 Map Changes

- Added Facility Address on map
- Added Facility SWPPP operator on map

Public Works SWPPP May 2021 Map Changes

- Added Facility Address on map
- Added Facility SWPPP operator on map

Central Stores SWPPP May 2021 Map Changes

- Added Facility Address on map
- Added Facility SWPPP operator on map

BMP Effectiveness

Review of BMP:

- New SWPPP Development: High-priority facilities were reviewed to determine if new SWPPP development would be necessary by December 31.
- SWPPP Modifications: SWPPP modifications were made as necessary.

Program Plan Revisions: Program Plan changes are not needed at this time.

BMP 6.3: Pollution Prevention by Contractors

Description

The City will require through the use of contract language, training, standard operating procedures, etc., that contractors employed by the city and engaging in activities with the potential to discharge pollutants use appropriate control measures to minimize the discharge of pollutants to the MS4.

Annual Reporting Requirements

None

BMP 6.4: Stormwater Pollution Prevention Training Plan

Description

The City will develop a training plan in writing for applicable staff. The City will maintain documentation of each training event conducted for a minimum of three years after the training event.

Annual Reporting Requirements

A list of the training events conducted in accordance with the permit requirements including the following information:

- The date of the training event.
- The number of employees who attended the training event.
- The objective of the training event.

Training Event Summaries

Trainings are posted on the City's online training platform, VectorSolutions (formally TargetSolutions). Trainings were assigned May/June to departments in this year's rotation per training plan. For departments not within the City's organization, but covered under the City's MS4, trainings are given either in person or through PowerPoint distribution. A record of employee completion and training sign-ins are available upon request.

Date	Attendees	Objective
Online Training	58	Parks and Rec Stormwater Pollution Prevention Training
Online Training	32	Public Utilities Stormwater Pollution Prevention Training
In Person Training	23	HEC Stormwater Pollution Prevention Training
In Person Training	33	HCPS Stormwater Pollution Prevention Training

BMP Effectiveness

Review of BMP: Online or in person training was given for this year's rotation per training plan.

Program Plan Revisions: Program Plan changes are not needed at this time.

BMP 6.5: Turf and Landscape Nutrient Management Plans

Description

The City will maintain and implement turf and landscape nutrient management plans on all lands owned or operated by the City where nutrients are applied to a contiguous area greater than one acre.

Annual Reporting Requirements

A summary of any new turf and landscape nutrient management plans developed that includes:

- Location and total acreage of each land area.
- The date of the approved nutrient management plan.

Summary of new nutrient management plans

No new plans were developed.

Existing Nutrient Management Plans

1. Heritage Oaks Golf Course; 38°26'49.97"N, 78°54'15.82"W; 66.42 acres; 11/1/2017
2. Smithland Park; 38°26’55”N, 78°50’02”W; 5 acres, 2.5 acres, 10 acres; 11/1/2018
3. Purcell Park; 38°25’33”N, 78°52’53”W; 1 acre, 5.0 acres; 11/1/2018
4. Simms Field; 38°27’15”N, 78°51’30”W; 1.6 acres; 11/1/2018
5. Ramblewood Fields; 38°24’44”N, 78°53’13”W; 3.6 acres; 11/1/2018
6. Harrisonburg High School; 38°26’30”N, 78°54’37”W; 11.14 acres; 3/1/2018

BMP Effectiveness

Review of BMP: Nutrient management plans are in place at the required facilities.

Program Plan Revisions: Program Plan changes are not needed at this time.

TMDL Special Conditions

Chesapeake Bay TMDL Special Condition

Description

In its Phase I and Phase II Chesapeake Bay TMDL Watershed Implementation Plans (WIP), the Commonwealth committed to a phased approach for MS4s to implement necessary pollutant reductions (phosphorus, nitrogen, and sediment). This permit (2018-2023) requires implementation of an additional 35% pollutant reductions as specified in the 2010 Phase I and II WIPs. In combination with the 5% pollutant reductions that have already been achieved, the total reduction at the end of this permit term is 40%.

The City developed the draft Chesapeake Bay TMDL Action Plan which was submitted to the Virginia Department of Environmental Quality with the Registration Statement.

The City will implement its Chesapeake Bay TMDL Action Plan and submit progress reports in its MS4 Annual Report in accordance with the permit requirements. Any updates to the Chesapeake Bay TMDL Action Plan will be submitted with each MS4 Annual Report.

Program Plan Requirements

The Chesapeake Bay TMDL Action Plan will be incorporated by reference into the program plan.

Anticipated BMPs or Strategies

The Chesapeake Bay TMDL Action Plan is available at: https://www.harrisonburgva.gov/MS4-permit-program

Annual Reporting Requirements

Once the Chesapeake Bay TMDL Action Plan is developed, each subsequent annual report shall include:

- A list of BMPs implemented during the reporting period but not reported to the DEQ Warehouse and the estimated reduction of pollutants of concern achieved by each and reported in pounds per year;
- If the permittee acquired credits during the reporting period to meet all or a portion of the required reductions, a statement that credits were acquired,
- The progress, using the final design efficiency of the BMPs, toward meeting the required cumulative reductions for total nitrogen, total phosphorous, and total suspended solids; and,
- A list of BMPs that are planned to be implemented during the next reporting period.

BMPs Implemented during the reporting period but not reported to the DEQ Warehouse

1. Homeowner BMPs
2. Bioreactor (Pending DEQ Approval)
3. Land Conversion

Acquired Credits

No credits were acquired during this permit year.

Progress towards Chesapeake Bay TMDL

TMDL Action Plan: The City of Harrisonburg has developed a Chesapeake Bay TMDL Action Plan and it is available at http://www.harrisonburgva.gov/MS4-permit-program.

List of Control Measures Implemented During the Reporting Period: Street Sweeping, Homeowner BMPs, Septic to Sanitary Sewer Connections, Land Conversion, Bioreactor (Pending DEQ Approval)

Estimate Reduction Achieved by Each Control:

Summary of Completed BMPs					
Type of BMP	**Project Name**	**Location**	**Reductions (lbs/yr)**		
			TP	**TN**	**TSS**
Permanent Water Quality Trading Credits	As Needed	Nutrient Credit Market	8	59.44	571.44
North End Greenway – Permanent Water Quality Credits	North End Greenway Stream Restoration	North End Greenway	117.90	256.10	40,660.00
Street Sweeping	Street Sweeping (annual)	Harrisonburg, VA	21.95	90.18	33,475.39
Storm Drain Cleaning	Storm Drain Cleaning (annual)	Harrisonburg, VA	24.44	110.00	0
Septic to Sanitary Sewer Connections	Septic to Sanitary Sewer Connections (since 2006)	Harrisonburg, VA	0	499.79	0
Homeowner BMPs	Homeowner BMPs (annual)	Harrisonburg, VA	10.19	130.68	0
BMP Retrofits	HCAP Program	Harrisonburg, VA	0.071	0.673	138.129
Bioreactor	Bioreactor	Purcell Park	0	pending	0
Urban Tree Canopy Expansion	New Tree Planting	Harrisonburg, VA	3.15	14.17	430.20
Land Conversion: Turf to Mixed Open	Pollinator Habitats (1.27ac)	Harrisonburg, VA	1.46	6.71	0
		Total	**187.161**	**1167.743**	**75,275.159**
		Amount Needed by 2023	**354**	**2,684**	**303,897**

BMPS to be implemented during next reporting period

The anticipated BMPs to be implemented during the next reporting period include (but are not limited to): Storm Drain Cleaning Practice, Septic to Sanitary Sewer Connections, Tree Planting, Permanent Credit Purchases, Stream Restoration, Pollinator Habitat Conversion, Homeowner BMPs, BMP Retrofits, and Bioreactor projects.

Below is a table with the estimated projects and any estimated reduction values for the remainder of the permit period.

Summary of Planned BMPs for 2018-2023 Permit Cycle					
Planned Type of BMP	**Project Name**	**Planned Location**	**Estimated Reductions (lbs/yr)**		
			TP	**TN**	**TSS**
Permanent Water Quality Trading Credits	As Needed	Nutrient Credit Market	8	59.44	571.44
North End Greenway – Permanent Water Quality Credits	North End Greenway Stream Restoration	North End Greenway	117.90	256.10	40,660.00
Stream Restoration	Mountain View Drive Stream Restoration	Harrisonburg, VA	144.97	415.90	49,980.00
Stream Restoration	Blacks Run South Stream Restoration	Harrisonburg, VA	688.00	1496.00	1,312,327.00
TBD[3]	VMRC		TBD	TBD	TBD
Street Sweeping	Street Sweeping (annual)	Harrisonburg, VA	21.95	90.18	33,475.39
Storm Drain Cleaning[4]	Storm Drain Cleaning (annual)	Harrisonburg, VA	9.77	43.96	0
Septic to Sanitary Sewer Connections[5]	Septic to Sanitary Sewer Connections (since 2006)	Harrisonburg, VA	0	499.79	0
Homeowner BMPs[6]	Homeowner BMPs (annual)	Harrisonburg, VA	Variable	Variable	Variable
BMP Retrofits[7]	HCAP Program	Harrisonburg, VA	0.071	0.673	138.129
Bioreactor	Bioreactor	Purcell Park	0	Pending	0
Urban Tree Canopy Expansion[8]	New Tree Planting	Harrisonburg, VA	3.27	14.69	442.70
Land Conversion: Turf to Mixed Open[9]	Pollinator Habitats	Harrisonburg, VA	0.89	4.1	0
		Total	**994.82**	**2,880.83**	**1,437,594.66**
		Amount Needed by 2023	**354**	**2,684**	**303,897**

[3] VMRC project still in evaluation phase and final BMP type has not been determined

[4] Annual credit that varies

[5] Estimated that there are still 50 septic systems within Harrisonburg. TN value reflects reductions to-date, however this value may increase

[6] Homeowner BMPs represent annual credits that are variable depending on compliance rates and number of residents who signup or renew their credits

[7] Represents the reduction values to-date. This value may increase depending on the type and number of projects completed

[8] Estimated value by assuming 50 new trees per year. Between 2018 and 2020, the average number of trees added per year has been around 200 new trees per year. This value may increase.

[9] Represents the reduction values to-date. This value may increase depending on new land conversions.

Local TMDL Special Conditions

Description

The City will develop a local TMDL action plan designed to reduce loadings for pollutants of concern if the permittee discharges the pollutants of concern to an impaired water for which a TMDL has been approved by the U.S. Environmental Protection Agency (EPA) as described below:

1. For TMDLS approved by the EPA prior to July 1, 2013, and in which an individual or aggregate wasteload has been allocated to the permittee, the permittee shall update the previously approved local TMDL action plans to meet the conditions of the new permit as applicable, no later than 18 months after the permit effective date and continue implementation of the action plan; and
2. For TMDLs approved by EPA on or after July 1, 2013, and prior to June 30, 2018, and in which an individual or aggregate wasteload has been allocated to the permittee, the permittee shall develop and initiate implementation of action plans to meet the conditions of the new permit as applicable for each pollutant for which wasteloads have been allocated to the city's MS4 no later than 30 months after the permit effective date.

Annual Reporting Requirements

For each reporting period, each annual report shall include a summary of actions conducted to implement each local TMDL action plan.

Smith Creek TMDL

Smith Creek watershed has a TMDL that was approved by the EPA prior to July 1, 2013 and has an associated wasteload allocation. The Smith Creek Action Plan was updated and submitted to DEQ no later than 18 months after the permit effective date. The Action Plan was updated and submitted to DEQ on 4/29/2020. It is available at http://www.harrisonburgva.gov/MS4-permit-program.

Best Management Practices to Reduce Bacteria

BMP Strategy 1: Domestic Pets (Cats and Dogs)

- There are 20 pet waste stations with signage throughout city parks. Approximately 72,000 bags are used at the stations every year.
- 4,750 linear feet of Blacks Run and its tributaries that were restored in Purcell Park, a municipal park, in 2012. The surrounding stream buffer was put into conservation easement with a national land trust.
- Smithland Road Dog Park was constructed in early 2015 and includes four pet waste stations. Park rules include that pet waste must be picked up and properly disposed of. City of Harrisonburg Parks and Recreation staff maintain these pet waste stations on a regular basis.

BMP Strategy 2: Urban Wildlife

- The City provides maintenance and repair to the storm drain system that is located on the public street right-of-way or in easements specifically assigned to the City and designated for drainage. One flusher truck cleans outfalls from approximately April – October, as weather allows.

- The Stormwater Utility Fee Credit Program provides incentives for homeowners who disconnect roof drains from the storm sewer system. The program provides best practice and site design specifications for this practice.

BMP Strategy 3: Illicit Connections or Illicit Discharges to the MS4

- Sec. 7-3-1 to 7-3-80 of the sewer ordinance requires septic systems to be inspected and pumped out every five years. The sewer ordinance was updated to include this requirement in August 2018.

Best Management Practices to Reduce Sediment

- The street sweeping program annually removes an estimated 180.62 lbs of TSS from the Smith Creek Watershed per year.
- The storm drain cleaning program annually removes an estimated 562 lbs TSS from the Smith Creek Watershed per year.
- The leaf collection program annually removes an estimated 4,022 lbs TSS from the Smith Creek Watershed every year.

Pollutants of Concern: Nutrients, Sediment, Bacteria

Strategy 1: Traditional Written Materials

- Stormwater and Environmental Newsletters: This email newsletter has a subscription list of around 700 contacts and each newsletter is opened by around 40-50% of the subscription list.
    - *The Tree Factor*. March 2021
    - *A History of Rainwater Harvesting and Rain Barrels.* May 2021
- Harrisonburg Public Works Facebook Page: The Harrisonburg Public Works Facebook page promotes high-quality receiving waters, education about the Chesapeake Bay and local TMDLs, and information about local events and projects. During this permit year Harrisonburg Stormwater Facebook Page became Harrisonburg Public Works. This switch was made to capture more of the activities that occur at Public Works as well as to increase the number of people following our page. During this permit year, 91 posts were made to the Harrisonburg Stormwater Facebook page. Each post reached an average of 529 people.

Strategy 2: Media Materials

- Daily News Record Articles
    - Daily News Record Article, by Kathleen Shaw: Garden for the Greater Good. August 8, 2020. https://www.dnronline.com/dnronline/garden-for-the-greater-good/article_241b42b2-c627-574d-a139-b7ac5f105f51.html
    - Daily News Record Article, by Ian Munro: City Public Works Wins Gov.'s Gold Environmental Award. March 26, 2021. https://www.dnronline.com/news/local/city-public-works-wins-gov-s-gold-environmental-award/article_5f1e6a81-a1c4-5dd5-9fe8-0269d72abf49.html
- Other News Articles

    - Augusta Free Press Article: Purcell Park Bioreactor Project wins 2021 Gold Medal Governor's Environmental Excellence Award. March 31, 2021. https://augustafreepress.com/purcell-park-bioreactor-project-wins-2021-gold-medal-governors-environmental-excellence-award/
- Press Release
    - City Wins 2021 Gold Medal Governors Environmental Excellence Award. March 29, 2021

Strategy 3: Speaking Engagements

- All speaking engagements attended by stormwater staff are focused on explaining water quality, including TMDLs, as well as Harrisonburg's role in meeting the Chesapeake Bay TMDL. Staff attended 6 educational events and reached an audience of approximately 101 participants. Additionally, staff gave a virtual presentation at the 2021 Governor's Environmental Excellence Awards Ceremony that reached an unknown number of people. These speaking engagements do not include Blacks Run Clean Up Day, Middle School Watershed Field Trips, or the annual rain barrel workshop as these events are counted as Public Involvement Activities. Our traditional reach through speaking engagements was partially reduced this permit year due to COVID-19 restrictions that limited in-person meetings as well as school gatherings.

Strategy 4: Workshops/City Programs

- As part of advertising city programs aimed at installing or promoting stormwater BMP installation (Harrisonburg Conservation Assistance Program, Stormwater Utility Fee Program), city staff communicate the reasons why nutrients are an issue in local water quality as well as ways for landowners to reduce impacts from their property.
- HCAP Site Visits: The City partners with the Shenandoah Valley Soil and Water Conservation District (SVSWCD) to implement the Harrisonburg Conservation Assistance Program which includes speaking to landowners about stormwater issues during site visits. The SVSWCD conducted 14 site visits this past year.

Strategy 5: Staff Training

- As part of the Good Housekeeping / Illicit Discharge training, city staff are trained bi-annually on stormwater issues. This training includes information about Harrisonburg's watersheds, water quality impairments, and TMDLs. The training is given to field staff through an online training platform called VectorSolutions (formerly TargetSolutions). Copies of the training material can be provided upon request.
